Subject: Area 40 RDIP#2 update

Hi Everyone – Today, we are beginning to receive zero valent iron (ZVI) at the site in preparation of installation of the Permeable Reactive Barrier (PRB). Due to the volume of ZVI, we anticipate deliveries to continue daily between now and September 25. We will be collecting soil samples tomorrow from the wing wall trench area in order to develop the appropriate stabilization mixture. Trenching activities for the wing walls and PRB will begin the week of September 21 and continue through October.

Let me know if you have questions. Chris
